VOL. XIX—NO. 282

CHARLEROI, WASHINGTON COUNTY, PENNSYLVANIA, MONDAY, MAY 5, 1919

TWO CENTS

DETACHMENT OF MARINES WILL VISIT CHARLEROI WEDNESDAY

To Make Short Trip to Roscoe, and Then Give Exhibition Here

EXERCISES AT THE BALL PARK

The detachment of Marines which are to visit Charleroi on Wednesday in the interests of the Victory Liberty loan will arrive at 11:26 a. m., according to the present schedule. They will be taken to the Hotel Wilbur for lunch, immediately after which they will board a special street car and be taken to Roscoe, where, for an hour, it is proposed they give an exhibition drill, which will include bayonet exercise and other features which this detachment is prepared to present.

Returning to Charleroi later in the afternoon the men will rest up until after dinner when they will give an exhibition at the local ball park of drills and bayonet exercise, ending with a sham battle.

All members of the detachment, twenty in number, are non-commissioned officers and are instructors in the various exercises which they present before the people of Charleroi. Their presence here is being extensively advertised up and down the valley and it is anticipated there will be a large attendance at the ball park to witness the exhibition.

This is the first time Charleroi has had such a splendid attraction of this character to visit the town and it is expected to arouse the greatest interest. It is also expected to stimulate the sale of Liberty Bonds not only in this immediate vicinity but in all the communities in this section of the valley.

Further details of the visit of the Marines will be given later.

ATTENDS RECEPTION TO COMPANY "E"

F. H. Burwell, local manager of the Bell Telephone Company, was in Pittsburgh Saturday afternoon attending the reception given to members of Company E, 46th Telegraph Battalion, by the Mayor and officials of Pittsburgh. Company E was made up principally of employees of the Bell Telephone Company in the Pittsburgh District, and the officials of that corporation joined in the welcome to the boys. After the parade and reception held at the City-County building, the men were taken to McCleary's where a banquet was served. Members of the Battalion as well as a large number of other employees of the Bell company. It was a delightful occasion for the returned soldiers as well as the officials.

The Musical Auxiliary will hold a rehearsal at the home of Mrs. Ralph Hickey on McKean avenue this evening.

FURTHER EXTENSION OF DONORA SOUTHERN

The Donora Southern railroad, a subsidiary of the American Steel and Wire Company, is extending its tracks across the old Baird farm in Carroll township, work on the extension having commenced on Saturday last. It is understood the tracks will be laid to the boundary line of the property, which is near the railroad tower just above the old Schoenberger mine.

SURPRISE GIVEN TO RECENT BRIDE

A very pretty surprise wedding shower was tendered Mrs. Dr. Whitaker, formerly Miss Pauline Collier of Roscoe, by the teachers of the Ninth street school building, Friday afternoon. The affair took place in the teachers' room, at the conclusion of school, and proved a genuine surprise to the recipient, who, for the past school year, has ably served as a member of the teaching staff. Mrs. Whitaker was presented with a beautiful set of cut glass sherbert glasses. A nice luncheon was served.

The new bride will retain her position in the Ninth street school until the close of the present term, after which she will make her home in Flint, Mich., where her husband is a dental practitioner.

Mrs. Whitaker, who is the daughter of Dr. and Mrs. Collier, is a graduate of the Charleroi high school and also a pianist of pronounced ability. She served as accompanist and pianist in all the musical activities of the high school, while a member of the student body. After her graduation, she pursued a course in the music department of Oberlin College, later going to Ann Arbor, Mich., where she took a course in public school music. It was while a student in this institution that she met her present husband. The best wishes of a host of friends go out to the newly wedded couple.

CHARLEROI ADDS TO THE CONSCIENCE FUND

Among the "conscience" contributions made to the United States treasury last week was the sum of \$3 from Charleroi. No name as given as to who the contributor was, nor will the government make inquiries. It is satisfied to get the money, while the contributor has satisfied his conscience.

Guy Woodward, who served during the war with the first hospital unit, but who is now discharged from service, is spending the week in Wooster, Ohio, visiting with his parents. He will return to Charleroi next week and resume his accustomed place at the Elite garage. He expects to go to housekeeping in the Province house on Seventh street.

An Appeal For The Victory Loan

The Victory Liberty Loan campaign is two-thirds over but subscriptions have been reported for little more than one-third of the loan.

Is it conceivable that the American people, who with heart and soul waged the fight for freedom, will permit this loan of victory and thanksgiving to fail?

Our sons gave of their health, of their strength and of their lives that freedom might not perish. There are 1,500,000 American boys in France and Germany. Now that the war is ended it would be as reasonable for them to dishonor the nation by deserting the flag as for the nation to dishonor itself by deserting them.

Is it a large thing that we are asked to lend our money to pay the cost of victory?

Is American money less willing than American manhood? Let every one of the millions who have bought Liberty Bonds buy Victory Notes and success is sure.

CARTER GLASS,
Secretary of the Treasury.

We Must Have Vision

America did not attain her present position before the world through mere chance. It wasn't by accident that in a little more than a century, she has become the richest, the most progressive of nations. Not by sheer good luck that today she faces an opportunity to reach out and take world leadership.

Back of all this was the vision of American industry, American commerce, American finance, but above all of American genius, enterprise and aggressiveness.

When opportunity knocked America was at home and ready to get busy on the job without hesitation or delay. She went to it.

And more than ever today we must have vision.

Must be able to look ahead into the future and see what is in store for us if we make the most of present opportunities. Must rise to the occasion and leave nothing undone that will make for our advantage. Must, most of all, do the things he world accepts as the natural things for us to do in a word retain the world's good opinion and confidence.

In this world war we came through with colors flying. Germany had the allies beaten to their knees and gasping for breath when we got to the battle front. And while the Yankee doughboys were mopping the Hun onrush the allies were afforded an opportunity to get their breath and come back.

You all know what happened then.

Now every one of the nations is engaged in the same cleaning up program. Ours is perhaps a trifle the largest; we had planned most extensively had gone into this thing with characteristic American vision.

We must finish in the same way. Right. Cleanly. Completely.

We cannot afford to make a half way job of it; a botch.

The world at large is watching us.

The Victory Liberty Loan, put over the top, will help Uncle Sam out of his financial predicament. Will clear the decks for another rush to greater things.

Pave the way for greater accomplishments, more abundant prosperity. And we who will benefit must send our dollars to the rescue.

Must be able to look ahead and see what it means for us.

BALL SEASON WILL OPEN ON SATURDAY RED "V" SIGN OF TRUE AMERICANS

The "big show" will open in Charleroi next Saturday afternoon when them.

Arch Osborne's athletes will stack up against the Pittsburgh Collegians at 5:00 or more he will have a red the ball park. As war conditions are "V" in back of the regular blue Victory passing and as we are getting tory loan button.

back on to a peace basis, the people If he hasn't the red V "hit him up," can give more attention to our national pastime, and we doubt not the and bled and died that the Hun might "fans" of Charleroi will give splendid support to the home team. It de-

support to the home team. It de- Tell him about the boys who fought down t heir tools and gave up their jobs at immense financial sacrifice to fight to make the world a safe place in which to live.

For service, quality and quantity when you want ice call G. W. Sil- 282-t1-p* across when they were needed.

MUCH WORK NEEDED TO PUT VICTORY LOAN OVER THE TOP

TAR BURNERS REPORTED A GREAT SUCCESS

The tar burners recently installed on the screw propeller Clairton of the Carnegie Steel Company, have proved successful. It is said they performed their duties beyond all expectations, and it is expected that all the other boats of the Carnegie line will be equipped with the same device. If this is done it will mean a great deal of time saved, as well as labor, on each boat, and thus do away with the coal- ing process on every trip to the mines. The Clairton, after being completely overhauled, will soon be in commission again in the local trade.

MUCH MONEY IS ALREADY RAISED

Thirty million dollars of the \$105,000,000 Methodist Centenary fund already has been raised it was announced this afternoon at the organization meeting in the Fort Pitt hotel of 103 financial campaign chairmen who will conduct the Centenary financial campaign from May 18 to May 25 in the churches of Allegheny county.

Reports presented at the meeting show that the Methodist Episcopal church has perfected one of the most complete and efficient campaign organizations gotten together in the last five years. With clock-like precision the whole program of the campaign has been carried out day by day by the 700 odd churches in the Pittsburgh area.

This afternoon thirteen of the nine- teen campaign districts in the area have been thoroughly organized by the appointment of district and church chairmen. Team workers will be appointed in each church by Monday May 12.

Bishop Joseph Berry, presiding bishop of the Pittsburgh conference was an unexpected visitor to the meeting. He hurried here from Philadelphia delivered an enthusiastic Centenary address and left after the meeting for Buffalo.

Will R. McCord, financial campaign director, states that practically all churches in the area which includes Southwestern New York, Western Pennsylvania, West Virginia and Northern Virginia have been keeping up to their campaign schedules.

Beginning May 1 all union Barber Shops will open at 8 a. m. and close at 7 p. m. except on Saturdays when they will open at 8 a. m. and close at 9:30 p. m.

Our Job Department is always busy there's a reason.

Tell him that True Americans come across when the money is needed. Then ask him to join the \$500 club. If his heart is in the right place he will.

Subscriptions Are Behind Those of Fourth Liberty Loan

GREATER ACTIVITY NECESSARY

With the beginning of the final week in the Victory Liberty loan campaign, local Chairman John D. Berryman turned his remaining "battery" loose on the community for the purpose of adding greater impetus to the drive. The committee of seventy, or the emergency committee, is now actively engaged in soliciting subscriptions to the loan and it is expected their work will be a telling feature when the final totals are announced.

The campaign is still lagging considerably, only about 30 per cent of the bond issue having so far been subscribed. At the same period in the fourth Liberty loan campaign, when the total issue was six and one-half billions, 33 1-2 per cent of the bonds had been subscribed for. This deficiency means that much greater activity must prevail during the week than during the last two, otherwise the campaign will be failure.

Of the county quota of over seven millions of dollars, the reports up to Saturday night, made to the various banks, only \$2,022,200 had been sold. This leaves over five million dollars to be sold in the county during the remainder of the week, almost a million dollars a day. Chairman Daly and Chairman Berryman realize the importance of this work and urge every citizen in the community to not only work for, but to subscribe to this loan.

It is proposed to hold some meetings in the borough this week, in order to stimulate greater interest in the campaign, which the chairmen say must go over. Headquarters are very busy this week, and it was necessary to secure additional help this morning to take care of the clerical work. A number of industrial plants have sent in their subscriptions and this will add very materially to the sum total of the community.

Chairman Berryman, however, insists there be no let up on the part of the workers, but to bend every energy during the remaining days to put the loan across.

Francis Kohut son of Mr. and Mrs. Michael Kohut and Miss Margaret Kendrick, daughter of Mr. and Mrs. Joseph Kendrick, were married this morning at 9 o'clock in St. Jerome's church, Rev. Father Fries officiating. The witnesses were George Konig and Miss Margaret Swaab.

John Melvin, of the Claysville Recorder, was a visitor in Charleroi this morning.

Notice Odd Fellows

GENERAL CONDITIONS

Gradually it is beginning to dawn upon the average business man that the pre-war conditions are not likely to be restored so far as prices of commodities are concerned and on this is thoroughly understood it is more than probable that much of the uncertainty which now exists will disappear.

The United States is certain to restore the confidence that was somewhat shattered by a misconception of the conditions and the new levels of cost; from every quarter comes optimistic statements of the change of view and the readiness of men or vision to go ahead under full power. Employers and employees are learning everywhere that there must be co-operation and not antagonism; that the only way the interests of both can be conserved is through a reasonable understanding of the mutuality of interest.

One of the most careful observers of individual conditions says "labor's attitude as expressed in interviews with some leaders, is for a more intimate discussion between employers and employees as to conditions and arrangements, believing that in this way friction may be avoided. "It is certain that labor in this country is distinctly opposed to Bolshevism.

Hoarded money is seeking daylight and with the curculation of these idle funds there will come more activity in business and industrial circles and an improvement in the matter of employment. With the actual signing of peace treaty and the restoration of normal activities, it is reasonable to expect a more contented attitude on the part of the public and less of pessimism, as a result of war fears and the difficult war problems.—Harrisburg Telegraph.

THE WAY THE WIND BLOWS

A straw vote taken by a Fort Wayne newspaper in northern Indiana and neighboring districts in Ohio and Michigan gives a rather remarkable result. Among the Republicans mentioned Gen. Leonard Wood has virtually twice as many votes as his next competitor, 1,266 to be exact, while on the Democratic side Vice President Marshall—an Indiana man—ran ahead of Mr. Wilson.

No one would seriously dogmatize from any local straw ballot. Nevertheless it is interesting to note that as in the votes taken in New York among returning soldiers, Gen. Wood shows a strength which we doubt politicians will ignore. Despite the desperate efforts of the Wilson administration to obscure him and prevent him from exhibiting his exceptional powers and in spite of his having made no statement of political intentions, he clearly stands very high in public estimation and is likely to be one of the chief political possibilities in the next Republican convention.

Gen. Wood is a native of New Hampshire, entered the army from Massachusetts and is now a citizen of Kansas.

Victory Liberty gold notes are the best investment a man can make today. They pay such a splendid rate of interest and are of such short duration that any man ought to be able to dig up enough money to secure at least one.

The decision of the Carnegie Steel Company to ship coal down the Ohio to Mingo Junction and transfer it to the point to plants in Ohio and Indiana shows that this big corporation is prepared to utilize the full power of water transportation.

North Dakota farmers who accepted Mr. Todtley's socialism means of escape from the oppression of grain men remind one of the man who gave his horse a sprinkling of green paint and then asked him to swallow a potato bug.

The Victory Liberty loan will close Saturday night. Only five more days after today in which to accomplish the task set before us. We must get back of the campaign and boost it to the limit.

The Patch of Honor

JOKE FOR MODERN BURGLAR

Herring's Safes, Considered Marvellous Years Ago, Would Be Laughed at in This Generation.

If a modern burglar or "safe cracker" could see some of the safes invented by Silas Herring he would probably have a good laugh. For a "modern" safeblower must be a bit of a scientist with a large knowledge of explosives; an old-fashioned safe would be easy for him to get into; but, in those days the Herring safes were considered marvellous and absolutely theft and fireproof.

Herring was born in Shrewsbury, Vt., and began his career as a grocery clerk. Tiring of this after some six years, he went into the lottery business, saved \$10,000 and started a wholesale grocery concern in New York city. A fire and a panic ruined his business, so he obtained the agency for the Salamander safes—so named, probably, because they were able to come through fire unburnt. He got the right to manufacture them later, and kept on improving and improving them each year. He once put \$1,000 in the drawer of one, sent it to the world's fair and offered the money to any one who could get into the safe and get it. No one got it.

But nowadays big banks and trust companies would laugh at these old square safes. The "burglar proof" safe today is round like a ball, and has a door that screws in, leaving no cracks for explosives. Even if any were poured into the hinges, the explosion would only drive the door more firmly into the casting of the safe. Herring died in 1881.

MANY VARIETIES OF SUGAR

Those Which Are Contained in Dried Fruits Are Recommended as of Very High Food Value.

When you say sugar, you mean that white crystalline material which comes originally from the sugar cane or the sugar beet. And that substance is a pure sugar. But it is not the only sugar, by any means.

If you were a chemist you would call that sugar "sucrose" and you would remark quite casually that, of course, there are other sugars.

Some of these other sugars are "glucose," or "dextrose," or "grape sugar," "fructose," or "levulose," or "fruit sugar," "lactose," or "milk sugar," and "maltose," or "malt sugar."

Honey, corn sugar, maple sugar and apple syrup, corn syrup and many other syrups contain one or more of these other sugars. In this sense, all the sugar substitutes are not really substitutes at all, but are sugars just as

cane sugar is sugar. All fruits contain sugar of one kind or another. Dried fruits—prunes, figs, apricots, dates—contain a great deal of sugar. They can be used by themselves as sources of fuel for home fighters.

All these sugars have a very high food value. That is the second fact to keep in mind. They are energy foods and of particular value in that they act very rapidly in producing energy for the body to use.

Beneficence Without Ambition

At present we behold only the rising of our sun of empire—only the fair beginnings of a great nation. We departed early—we departed at the beginning—from the beaten track of ambition. Our lot was cast in the age of revolution—a revolution which is to bring all mankind from a state of servitude to the exercise of self-government—from under the tyranny of physical force to the gentle sway of opinion, from under subjection to domination over nature.

It was ours to lead the way—to take up the cross of republicanism and bear it before the nations, to fight its earliest triumphs, to illustrate its purifying and elevating virtues, and by our courage and resolution, our moderation and magnanimity, to cheer and sustain its future followers through the baptism of blood and martyrdom of fire. A mission so noble and benevolent demands a generous and self-denying enthusiasm. Our greatness is to be won by beneficence without ambition.—William Henry Seward.

Nerves in Sexes Differ

The late Professor Munsterberg of Harvard, believed that the sensory mechanism of women worked quicker than that of men. He took the illustration of two sets of wires, corresponding to the nerves of the human body, conducting a current of electricity to a certain point. The wires of woman's nerves were able to communicate to the fixed point in this case the brain, the current much more quickly than the male equipment, and furthermore, reacted to currents too faint for man's wires to take up. The addition of these subtle stimuli produced in the receiving center an entirely different comprehension in woman than in man, Munsterberg argued.—Chicago Examiner.

Superstition Hard to Down

It has recently been discovered that the "thirteen" superstition still exists in New York. At a dinner to which he was invited one of the guests discovered that 13 persons were present. He was so disturbed over this fact that he left the table.

In tracing the origin of this superstition, said a traveler, "I found that the Turks have almost eliminated 'thirteen' from their vocabulary. The Italians discontinued using the number in making up their lotteries and the thirteenth card in a game they play has on it the symbol of death."

A Great Challenge

The Victory Liberty Loan is a great challenge than any prior call for service to the government. It is the last nail to be driven in the archway of peace, and we are the instruments to preach peace to the world. If we should fail the whole structure built at so terrible a price would fall to the ground.

Evidence of Failure

We frequently find men of culture who take pride in their art or their science but who have no feeling for morality or religion and are rather proud of the fact. Is it not rather sad evidence that their culture is failing to raise the possibilities of experience to their highest power?—Minneapolis Journal.

Called for Rest

My brother was telling his little daughter a story and at the same time was trying to get her to sleep, which was a hard thing to do. He was telling the story of Rip Van Winkle. He was saying, "And he walked and walked and walked—" "O, don't wait so much," chimed in the little girl.—Chicago Tribune.

Tweeds Copied From Nature

Ideas for the colors in the best Scotch tweeds are found in the bed of the River Garry, in the pass of Killiecrankie. Granite, porphyry and jasper are found there in rich reds, grays and greens, beautifully mottled and mixed in finely contrasted colors.

Asbestos Ropes?

To lessen the amount of metal used in fire escapes a Hungarian living in Canada has patented one, the chief features of which is a basket to be lowered by ropes from a bracket fastened to a window frame.

Ancients Made Bricks to Last

In the British museum are bricks taken from the buildings in Nineveh and Babylon, which show no signs of decay or disintegration, although the ancients did not burn or bake them, but dried them in the sun.

Can, but Don't

German experimenters have found that explosions can be caused in gas works by spark from telephones, although nothing of the kind has been known to occur.

New Lighthouse Mechanism

Mechanism in a lighthouse that uses electric light automatically switches on a new lamp and moves it into focus should the original lamp be extinguished.

What Suez Canal Does

Although the Suez canal is only 99 miles long, it reduces the distance from England to India by sea nearly 4,000 miles.

Too Generous

The trouble with the fellow who borrows trouble is that he wants to loan some of it to everyone he meets.

Optimistic Thought

The feeling of shame at what is wrong is the commencement of virtue.

WANTED

Agents to sell motor trucks good proposition open to live men to represent a good popular priced motor truck. Write immediately for full particulars. Stellar Motor Company, Pittsburg, Pa.

Eyes Had to Be Blue

Blue-eyed babies always claim a preponderance of admirers. The fact has just again been emphasized—this time at Hampstead, England. It was announced in the press that the town officials had a "bunny blue-eyed baby" for adoption, and straightway 350 would-be adopters wrote to secure it. Unfortunately it was found that the infant's eyes had been wrongly described. The eyes were not blue, after all, and when they heard of this some of the ladies withdrew their offers.

The Fragrant Weed

The use of tobacco was first discovered in America when Columbus, in 1492, sent his first party to explore the island of Cuba. It was first observed that these herbs were burned and carried by the natives to perfume themselves. It was later discovered that these herbs were also used for chewing, and later as America was opened up and explored, it was observed that they were smoked in large quantities.

Balsam Gum

The gum of the balsam fir, Abies balsamea, is known commercially as Canada balsam, and is largely used in the manufacture of optical instruments and in various other ways about scientific laboratories. There is a constant market for it, the price varying with the quality and the supply. Some time ago a fair quality was worth 20 cents per pound.

Uncle Sam's Islands

The island of Tutuila and other small Samoan islands came into the possession of the United States in January, 1900. This island has an area of about fifty-four square miles, with a population of 3,800. Mauna and the other islets have a united area of about twenty-five square miles, with about 2,000 inhabitants. Pago Pago is the only good harbor.

Enough Said

Brother and sister were parted for the first time, he going on a month's trip with their mother and father and she to spend the month with their grandparents. The leave taking was rather strained as neither one of them quite knew what to say. Finally little brother walked up and putting his arms around his sister said: "Maddie, I'm your brother an' you're my sister."

Valuable Tree

A wonderful tree, known as the shea, is beginning to attract commercial attention in western Africa. It supplies the native not only with nuts, which they highly prize, but with a butter that may become an article of commercial importance. It is already exported to Europe, where makers of artificial butter find use for it.

Paint on Window Glass

To remove paint or varnish from window glass, keep the spots moistened all soft with turpentine and ammonia; then rub with coarse cloth dipped in coarse sand. Or moisten spots with baking soda dissolved in hot water. Then scrape off. The edge of a coin is sometimes used.—Housewife.

Only American Flag

There are flags made of red, white and blue stripes, but the American flag has not only the stripes made in certain proportions, and number, but the stars are well arranged upon a blue field in certain proportions to a certain order. No one should mistake such hunting for the American flag.

Artificial Pearls

Essence of Orient from which artificial pearls are made, is produced from the brilliant scales of the ablet, or blay, a small fish with a green back and a white belly. About four thousand are required to produce a pound of scales, which gives a quarter of a pound of the essence.

Bracelets for Lunatics

Bracelets have been worn from time immemorial, but few wearers of the golden bands of the present day know that they were once used to distinguish the insane. Before lunatics were confined to asylums they wore an armlet for distinction.

Rare Visitors Recorded

The appearance of snowy owls, a rare occurrence, is reported. These remarkably beautiful birds come from the Arctic regions. Only four previous visitors have been recorded to the ornithological history of the country.

Several Guesses Allowed

"Copper to Remain Fixed."—Puzzle headline for cattle readers to solve. Guess whether it refers to the copper's pose, or something else again.—Buffalo Express.

It is said that there are scarcely more than 100 men in the whole world who are trained to be expert bank-note engravers.

Unhappiness in Power

Power is detested, and miserable is the life of him who wishes rather to be feared than to be loved.—Nepes.
